### ***Election/Restriction***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 1627

- I. Claims 59-81, drawn to an oligonucleotide array probes and a block of oligonucleotide probes, classified in class 435, subclass 6 or class 436, subclass 518.
- II. Claims 82-92, drawn to a method of comparing a target nucleic acid with a reference sequence, classified in class 435, subclass 6.

5. The inventions are distinct, each from the other because of the following reasons:

Inventions of group I and group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the array (inventions of group I) can be used in diagnostic assays and also in the group II methods. Thus, restriction is proper..

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to on to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10.
